Problem Statement/Industry

Problem Being Solved

Students and job seekers struggle to identify the skills required for their desired careers, understand the gap between their current skills and industry requirements, and find relevant learning opportunities. This makes it difficult for them to prepare effectively for employment and make informed career decisions with more confidence and clarity.

Supporting Data

Only 42.6% of Indian graduates are employable, showing a significant gap in job-ready skills today.

Problem Analysis

Affected Stakeholders

Students, recent graduates, and job seekers are directly affected because they may struggle to identify career-relevant skills and understand industry expectations. Colleges and universities are also affected as they face challenges in helping students become career-ready. Employers are affected when applicants lack the skills required for available jobs.

Impact on Stakeholders

Students, recent graduates, and job seekers are directly affected because they struggle to identify career-relevant skills and understand industry expectations. Colleges and universities face challenges in helping students become career-ready. Employers are affected when applicants lack the skills required for available jobs and changing job needs.

Root Causes

Outdated curricula, limited exposure to industry requirements, lack of practical learning, insufficient career guidance, changing skills, weak links between education and employment, and limited awareness of skill demands make it difficult for students and job seekers to prepare effectively for careers and changing workplace needs in career growth.

Personal/Team Connect

As students, we understand the challenges of choosing careers and developing the right skills. Our team is passionate about education, technology, and career growth. We have seen students struggle to understand industry expectations and prepare for jobs. This motivates us to address a problem that directly affects our peers and future career path.
